

What does gifted education mean to me?

I think that the Gifted education program has helped me much more than being in the normal classroom. I was bored in the normal classroom, this program changed that now I am challenged, and definitely not bored. To me the gifted program is more than just school, it is a place of interest, of learning and, of happiness. The gifted program broke the bounds of the classroom and made it like a place that I and others could learn and just think outside the box. In other words it changed my life all together and made my life better.

If I would have stayed in the normal classroom I would have never been able to have done some of the things that have made my life better like going out of my comfort zone and thinking outside the box. It isn't just the program that has changed my life, it was the teachers who pushed me to my limits then they pushed me more. The pushing shaped me and made me better and still is. The teachers also help me with what we are learning and do not abandon me.

The teachers and the program apart have changed my life but combined, it is the best thing that has happened to me, learning with good teachers. The combination of these two things, learning and good teachers, to me is perfect harmony. The gifted program has that perfect harmony of good teachers and learning.

Being in the gifted program has done more than just help me in the present but in the future too. I will not expect everything to be easy, I will know challenges when they come. I will also be persistent and not give up like that, I will try and try until I get it. That is what the gifted program has taught me not to give up and more so much more.

Being in the gifted program has changed my life for the better, helped me go outside my comfort zone and expanded my comfort zone too. Being in the gifted program also has made me realize not everything in life is easy there are challenges in life too and has made my life more enjoyable.

Being in the gifted program has changed my life forever in the best possible ways. It made me like reading and writing way more than when I was in the normal classroom and got me thinking in so many different ways. I enjoy being in the gifted program for this reason and more. I have learned what I have described and so so much more. If I were to tell you everything I learned this essay would be at least 2,000 words long and I mean at least 2,000. Thank you alot for reading this essay
